SUMMARY OF QUALIFICATIONS

Senior Full Stack Engineer with **15+ years of experience** designing, modernizing, and maintaining web applications. Specializes in **TypeScript**, **Vue.js**, **Nuxt**, and **C#/.NET**, with experience spanning frontend architecture, cloud-backed services, and technical leadership. Led a legacy application modernization that **reduced bundle size by approximately 90%** and **substantially improved rendering performance**. Brings a focus on **maintainable architecture, reusable components**, and **mentoring engineering teams**.

TECHNICAL SKILLS

Front-End: TypeScript, Vue.js (Composition API), Nuxt.js, Pinia (State Management), Blazor, Vuetify, Nuxt UI, Tailwind CSS, Material Design, ESLint, Vitest
Back-End: ASP.NET Core (C#), Entity Framework Core, Node.js, Cloud Functions (Firebase/GCP), REST APIs, OData, LINQ
Database: Cloud Firestore, Firebase Realtime Database, NoSQL, SQL Server, Database Design, Database Administration
Cloud & DevOps: Firebase, Azure DevOps, Google Cloud Platform (GCP), Microsoft Azure, CI/CD, Git, GitHub
Development Tools: GitHub Copilot, Gemini, Visual Studio Code, Visual Studio, Jira, Agile Methodologies
Game Development: Unity (C#), Game Design, Unity VC

RELEVANT WORK EXPERIENCE

Touchstone Group Associates, LLC, Cincinnati, Ohio (Hybrid)
Senior Full Stack Engineer | June 2015 - July 2026

- Led the modernization of a legacy MVVM framework to Vue.js, eliminating critical technical debt and saving $650 in recurring licensing fees per developer annually. Engineered frontend optimizations that achieved a ~90% reduction in total bundle size and improved rendering performance.
- Architected and deployed scalable cloud infrastructure on Microsoft Azure, standardizing TypeScript development across platforms and reducing development and deployment cycle times by more than 50%.
- Established rigorous automated linting, code quality rules, and testing patterns across the organization, significantly mitigating post-deployment runtime errors and maximizing long-term code maintainability.
- Designed and institutionalized a centralized, reusable UI component strategy using Vue/Nuxt, slashing codebase duplication by 58.6% across enterprise core platforms.
- Mentored and upskilled cross-functional teams of junior and mid-level software engineers on architectural best practices, fostering a culture of clean code and enhancing overall development throughput.

Moonstruck Games, Cincinnati, Ohio (On-site)
Game Director | January 2014 - May 2015

- Owned full-lifecycle 2D/3D game development in Unity; architected company brand website and integrated multiplayer SDKs for global leaderboards, achievements, and automated game replays.
- Integrated Unity Ads and in-game purchase systems to maximize player lifetime value (LTV) and establish consistent, recurring revenue streams.

Chicago West Pullman, INC, Cincinnati, Ohio (On-site)
IT Director | November 2010 - December 2013

- Managed end-to-end IT infrastructure operations, maintaining 99.9% uptime across enterprise hardware, secure corporate networks, and email architectures.
- Integrated 9 distinct social networking APIs to expand platform data sharing capabilities; managed, onboarded, and trained new engineering hires to accelerate integration into development cycles.
