

## EXPERIENCE

### Touchstone Group Associates, LLC — Senior Full-Stack Engineer

June 2015 – July 2026

Technologies used: ASP.NET, C#, MSSQL, Azure, Entity Framework, TypeScript, Odata, Vue.js, Nuxt.js, Visual Studio, VSCode, Unity

- **Rearchitected legacy MVVM framework** to Vue.js, successfully eliminating critical technical debt and improving application loading performance.
- **Engineered a scalable TypeScript architecture** from the ground up, accelerating cross-team development velocity and unifying code standards.
- **Enforced strict linting and code quality rules**, reducing post-deployment runtime errors and improving overall team maintainability.
- **Championed reusable component design**, cutting down code duplication across core web platforms.
- **Mentored junior and mid-level developers** on architectural best practices, increasing overall engineering team efficiency.

### Moonstruck Games — Game Director

January 2014 – May 2015

Technologies used: Unity, C#, Visual Studio

- **Architected and deployed** the company's primary website to establish its online brand presence.
- **Integrated Unity Ads network and in-game purchase systems** to drive game monetization and recurring revenue streams.
- **Led 2D and 3D game development lifecycle in Unity**, delivering cross-platform gaming experiences.
- **Implemented specialized SDKs** to power multiplayer features, including global leaderboards, user achievements, and automated game replays.

### Chicago West Pullman, INC. — IT Director

November 2010 – December 2013

Technologies used: ASP.NET, C#, MSSQL, JavaScript, HTML, CSS

- **Directed all IT infrastructure operations**, providing comprehensive hardware, software, and network helpdesk support across the enterprise.
- **Integrated 9 distinct social networking APIs** to expand platform connectivity and data sharing capabilities.
- **Managed, onboarded, and trained new engineering hires** to ensure rapid integration into active development cycles.
- **Configured and optimized secure corporate networks** and email architectures to ensure maximum operational uptime.

## SKILLS

|                 |                 |
|-----------------|-----------------|
| TypeScript      | JavaScript      |
| Vue.js          | Nuxt.js         |
| Vuetify         | Nuxt UI         |
| Pinia           | useState        |
| Node.js         | Vite            |
| Azure           | Firebase        |
| Azure DevOps    | GitHub          |
| Git             | Unity VC        |
| Firestore       | Cloud Functions |
| ASP.NET         | C#              |
| MSSQL           | NoSQL           |
| Unity3d         | Social APIs     |
| VS Code         | Visual Studio   |
| Jira            | ESLint          |
| Material Design | Tailwind CSS    |

## EDUCATION

### Cincinnati State — Software Engineering

Sept 2003 – Aug 2005

Studies focused on application development, web development, database programming, IT project management, and IT concepts.
