SUMMARY OF QUALIFICATIONS

Senior Full Stack Engineer with **15+ years of experience** designing, modernizing, and maintaining web applications. Specializes in **TypeScript**, **Vue.js**, **Nuxt**, and **C#/.NET**, with experience spanning frontend architecture, cloud-backed services, and technical leadership. Led a legacy application modernization that **reduced bundle size by approximately 90%** and **substantially improved rendering performance**. Brings a focus on **maintainable architecture, reusable components**, and **mentoring engineering teams**.

TECHNICAL SKILLS

Front-End: TypeScript, Vue.js (Composition API), Nuxt.js, Pinia (State Management), Blazor, Vuetify, Nuxt UI, Tailwind CSS, Material Design, ESLint, Vitest
Back-End: ASP.NET Core (C#), Entity Framework Core, Node.js, Cloud Functions (Firebase/GCP), REST APIs, OData, LINQ
Database: Cloud Firestore, Firebase Realtime Database, NoSQL, MSSQL, Database Design, Database Administration
Cloud & DevOps: Firebase, Azure DevOps, Google Cloud Platform (GCP), Microsoft Azure, CI/CD, Git, GitHub
Development Tools: GitHub Copilot, Gemini, Visual Studio Code, Visual Studio, Jira, Agile Methodologies
Game Development: Unity (C#), Game Design, Unity VC

RELEVANT WORK EXPERIENCE

Touchstone Group Associates, LLC, Cincinnati, Ohio (Hybrid)
Known for Ignite, which focuses on employee engagement, peer recognition, reward challenges, incentives, and social media integration to boost workplace morale and productivity.
Senior Full Stack Engineer | June 2015 - July 2026

- Spearheaded the modernization of a legacy MVVM framework to Vue.js, eliminating critical technical debt and reducing development overhead costs by $650 annually per engineer. Engineered frontend optimizations that achieved a ~90% reduction in total bundle size and a ~300% surge in page rendering performance.
- Architected and deployed scalable cloud infrastructure on Microsoft Azure, standardizing TypeScript development across platforms and reducing development and deployment cycle times by more than 50%.
- Established rigorous automated linting, code quality rules, and testing patterns across the organization, significantly mitigating post-deployment runtime errors and maximizing long-term code maintainability.
- Designed and institutionalized a centralized, reusable UI component strategy using Vue/Nuxt, slashing codebase duplication by 58.6% across enterprise core platforms.
- Mentored and upskilled cross-functional teams of junior and mid-level software engineers on architectural best practices, fostering a culture of clean code and enhancing overall development throughput.

Moonstruck Games, Cincinnati, Ohio (On-site)
Independent digital game development that focuses on mobile and social gaming development. Known for Crystal Craft, Wrap Attack, Bone Bash, Light Run, & Light Run 2.
Game Director | January 2014 - May 2015

- Architected and deployed the company's primary website to establish its online brand presence.
- Integrated Unity Ads network and in-game purchase systems to drive game monetization and recurring revenue streams.
- Led 2D and 3D game development lifecycle in Unity, delivering cross-platform gaming experiences.
- Implemented specialized SDKs to power multiplayer features, including global leaderboards, user achievements, and automated game replays.

Chicago West Pullman, INC, Cincinnati, Ohio (On-site)
A private family-owned investment firm and family office. Known for Gameland, SocialPoint, & Ourtown.
IT Director | November 2010 - December 2013

- Directed all IT infrastructure operations, providing comprehensive hardware, software, and network helpdesk support across the enterprise.
- Integrated 9 distinct social networking APIs to expand platform connectivity and data sharing capabilities.
- Managed, onboarded, and trained new engineering hires to ensure rapid integration into active development cycles.
- Configured and optimized secure corporate networks and email architectures to ensure maximum operational uptime.

EDUCATION

Cincinnati State
Software Engineering

- Comprehensive studies focused on full-stack application development, web development, database programming, and IT project management.

CERTIFICATIONS

- Blazor Certificate (2026)
